kurzcore Changelog

Current Version: v1.0.3 | **Total Releases:** 4 | **Last Updated:** 2026-11-03 07:05

Release v1.0.3

2026-11-03 07:05 • AI Assistant

Reason & Architectural Rationale:

Created Modrinth release changelog document without emojis.

Status	File Path	Change Summary / Purpose
CREATED	**CHANGELOG_MODRINTH.md**	Added clean Modrinth version release changelog

Release v1.0.2

2026-11-03 06:56 • AI Assistant

Reason & Architectural Rationale:

Upgraded Maven shade plugin ASM dependencies to 9.10.1 to support Java 25 bytecode (class file major version 69).

Status	File Path	Change Summary / Purpose
MODIFIED	**pom.xml**	Upgraded shade plugin ASM and ASM-commons to 9.10.1 for Java 25 class version 69 support

Release v1.0.1

2026-11-03 06:49 • AI Assistant

Reason & Architectural Rationale:

Restored Java 25 compiler release target across Maven pom.xml and documentation to support the newest Minecraft server versions and runtimes.

Status	File Path	Change Summary / Purpose
MODIFIED	**pom.xml**	Restored maven.compiler.release and compiler plugin configuration to Java 25
MODIFIED	**README.md**	Updated Java requirement documentation to Java 25
MODIFIED	**MODRINTH.md**	Updated JVM platform requirement to Java 25
MODIFIED	**RZXCORE_INTEGRATION_PROMPT.md**	Restored Java 25 target specification

Release v1.0.0

2026-11-03 06:44 • AI Assistant

Reason & Architectural Rationale:

Resolved Java version incompatibilities, fixed inventory item-stealing and drag exploits in GUI system, added transaction atomicity and WAL mode to SQLite database, exposed missing CooldownManager, CrossServerSync, and CommandFramework in CoreAPI, fixed race conditions in player data persistence, and corrected UTF-8 character encoding mojibake.

Status	File Path	Change Summary / Purpose
MODIFIED	**pom.xml**	Downgraded compiler release target to Java 21 LTS and stabilized ASM version to 9.7.1
MODIFIED	**src/main/java/com/rzx/core/api/CoreAPI.java**	Added getCooldownManager, getCrossServerSync, and createCommandFramework methods
MODIFIED	**src/main/java/com/rzx/core/impl/CoreAPIImpl.java**	Fixed Javadoc package name and implemented newly exposed CoreAPI methods
MODIFIED	**src/main/java/com/rzx/core/RZXCore.java**	Instantiated and wired CrossServerSync and CooldownManager, ensured clean shutdown cleanup
MODIFIED	**src/main/java/com/rzx/core/command/CommandFramework.java**	Fixed non-subcommand fallthrough and added automatic tab-completion for registered subcommands
MODIFIED	**src/main/java/com/rzx/core/data/PlayerDataService.java**	Implemented transactional batch upserts with rollback and fixed concurrent dirty tracking race conditions
MODIFIED	**src/main/java/com/rzx/core/storage/SQLiteDatabase.java**	Capped pool size to 1 and configured WAL journal mode with busy timeout
MODIFIED	**src/main/java/com/rzx/core/gui/Menu.java**	Implemented InventoryHolder to ensure robust menu lifecycle identification
MODIFIED	**src/main/java/com/rzx/core/gui/MenuListener.java**	Added InventoryDragEvent handler to prevent item theft and fixed premature unregistration
MODIFIED	**src/main/java/com/rzx/core/gui/MenuBuilder.java**	Removed redundant closeInventory call on pagination buttons
MODIFIED	**src/main/java/com/rzx/core/hook/PlaceholderAPIHook.java**	Saved plugin reference and implemented getRequiredPlugin
MODIFIED	**src/main/java/com/rzx/core/lang/MessageManager.java**	Enhanced placeholder substitution and refined MiniMessage and legacy color code handling
MODIFIED	**src/main/java/com/rzx/core/sync/CrossServerSync.java**	Cleaned UTF-8 mojibake
MODIFIED	**src/main/java/com/rzx/core/sync/NoOpCrossServerSync.java**	Cleaned UTF-8 mojibake
MODIFIED	**src/main/java/com/rzx/core/util/ItemBuilder.java**	Added ItemStack copy constructor and safe cloned item return in build
MODIFIED	**README.md**	Updated documentation to Java 21 LTS
MODIFIED	**MODRINTH.md**	Updated system requirements to Java 21 LTS
MODIFIED	**RZXCORE_INTEGRATION_PROMPT.md**	Updated integration prompt to Java 21 LTS
